Aurea global support

If you encounter a problem while using an Aurea product or require assistance with downloading the software or upgrading a product release, please, try to:

- Search the articles on the [Aurea Knowledge Base](#) for solutions to your issues.
- Search the product documentation and other product-related information that are also available on [Support Central](#).

If you still cannot find a solution, open a ticket on [Aurea Support Central](#). Information about the support organization is available on [Support Portal](#) as well.

You can also find the setup files on [Support Portal](#).

For information about purchasing an upgrade or professional services, contact your account executive. If you do not know who your account executive is, or for other queries, contact us through our [website](#).

Linking content to the Multiple Languages add-on

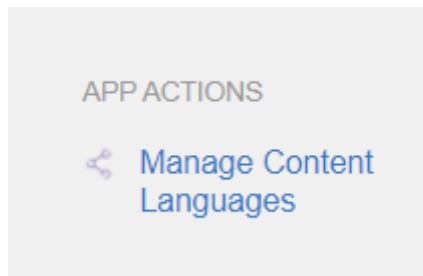

Here you can find details on linking content in different languages with the Multiple Languages add-on.

Fastpath: Content item, **Actions > Manage Content Languages**

To link a content item with the Multiple Languages Add-on:

1. Go to the content item you want to link.
2. Click **Actions > Manage Content Languages**.

Attention: User should be a member of the `Multi-Language Editors` group to be able to view this option.

3. Select the **Language** of the current content, for example, English, and click **Save**.

The content language has been set successfully. The screen to create or link other language versions is displayed.

Manage Content Languages

Language: English Save

Language Content

German Search Link Create

4. Create the other language versions by selecting the appropriate language and click **Create**.

For example, select German as **Language** and then click **Create**.

Manage Content Languages

Language: English Save

Language	Content
German	Sample Documents [DE] Unlink

Chinese Search Link Create

The document is created for the German version. Click the title to navigate to it and translate it manually.

5. If the content to be linked already exists in another language within the community, click **Search** next to the appropriate language.

On selecting the appropriate document, the Multiple Languages Add-on adds it as a linked content.

Attention: Only content of same content type can be linked, like all documents, all blog posts.

6. Similarly continue to create in other languages and translate the contents, as appropriate.

Manage Content Languages

Language: English ▼ Save

Language	Content	
German	Sample Documents [DE]	Unlink
French	Sample Documents [FR]	Unlink
Dutch	Sample Documents [NL]	Unlink

Chinese ▼ Search Link Create

7. To remove a linked content, click **Unlink** option next to the appropriate linked content.

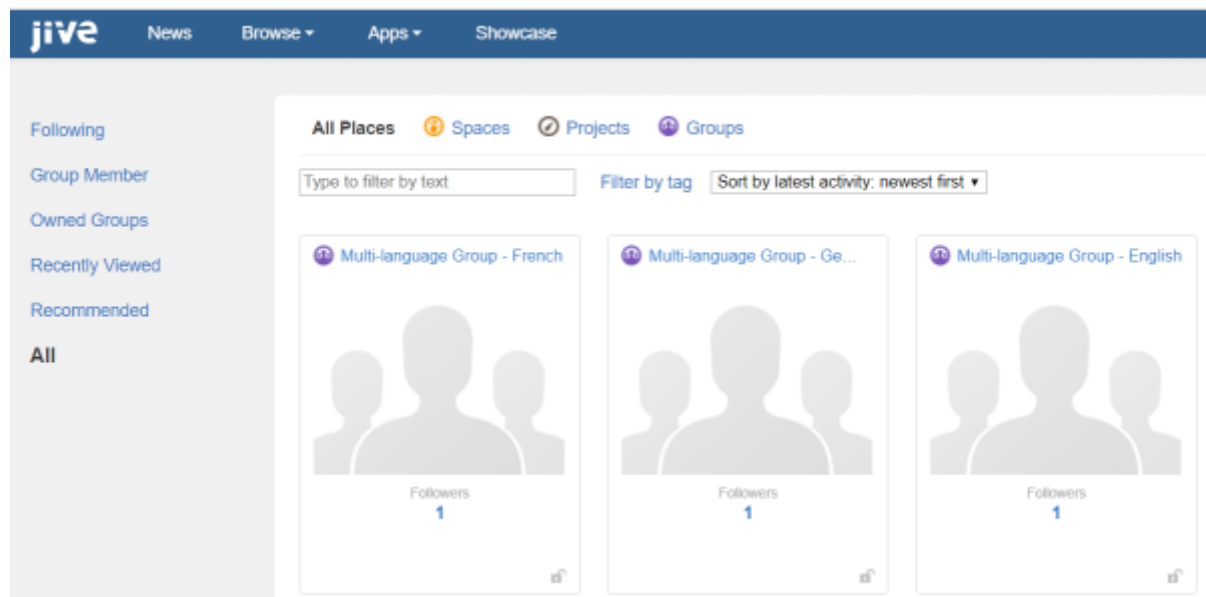

Linking places to the Multiple Languages add-on

Here you can find details on linking places with different languages with the Multiple Languages add-on.

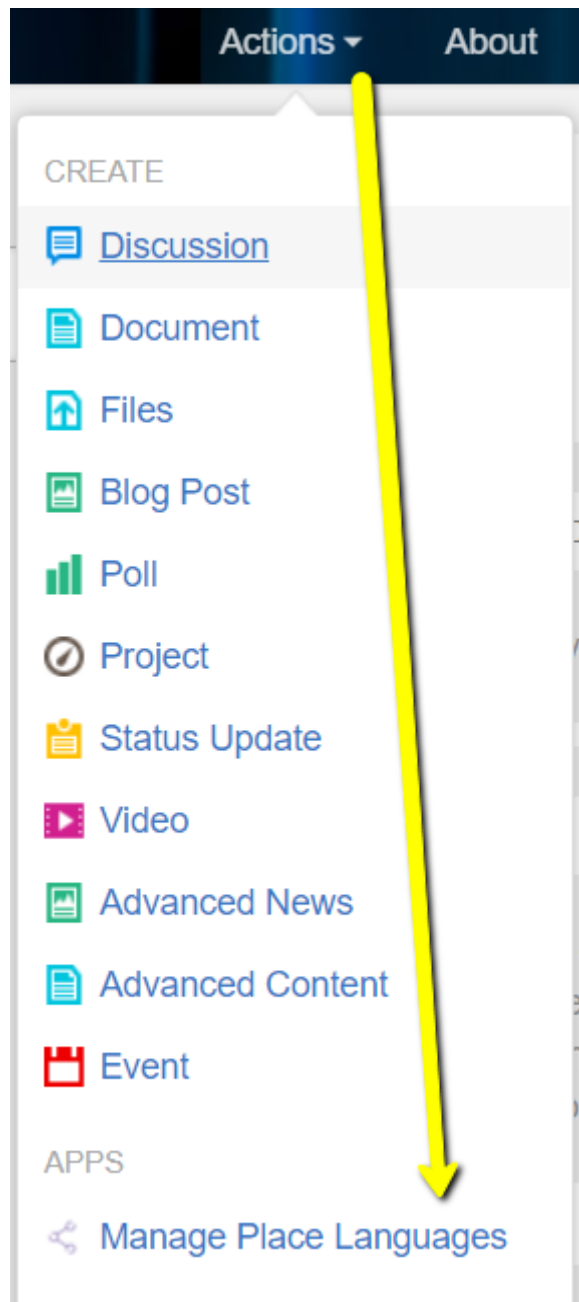

Fastpath: Place to be linked, **Actions > Manage Place Languages**

To link a place with the Multiple Languages Add-on:

1. Create places for different languages to be linked subsequently via Multiple Languages Add-on.

2. Go to one the prepared places.
3. Click **Actions > Manage Place Languages** .

4. Select the **Language** of the current Group (for example, English) and then click **Save**.

Manage Place Languages

You're editing:  **Multi-language Group - English**

Language: English  Save

 Language specific places can be linked with corresponding places in other languages. After linking places together, for each page you'll be able to select their counterpart in the corresponding place.

5. Select the other linked place language (for example, German), click **Search**, then select a place from the list, and close the window.

Manage Place Languages
